

Copyrights, Patents, and Trademarks are three types of intellectual property protection. They are different and serve different purposes.

Copyrights protect literary, artistic, and musical works and are registered at the [Copyright Office](#), Library of Congress.

Patents protect inventions and improvements to existing inventions. Trademarks include any word, name, symbol, or device, or any combination used or intended to be used in commerce to identify and distinguish goods of one manufacturer or seller from goods manufactured or sold by others and to indicate the source of the goods. Service marks include any word, name, symbol, device, or any combination used or intended to be used in commerce to identify and distinguish the services of one provider from services provided by others and to indicate the source of the services. The [U.S. Patent and Trademark Office](#) issues patents and registers trademarks.

I hope you find the resources on this page helpful in your search. If you have further questions or need assistance, please don't hesitate to [contact](#) my office.
